PROFILE

Software engineer with 7 years building web products used by millions, from checkout and payments at eDreams ODIGEO (7.9M Prime members) to account systems at the UK's largest news publisher. I own features end to end and work best in small, product-minded teams. I introduced spec-driven development with AI tools in my team of six, and the company later adopted it.

EXPERIENCE

eDreams ODIGEO - Front End Software Engineer, Checkout & Payments · Nov 2023 - present

- Increased successfully collected renewal payments by ~30% by integrating Apple Pay and Google Pay
- Built the promo code flow ahead of payment and an in-product feedback flow that sends customer problems straight to the product team
- Introduced AI-assisted, spec-driven development in a team of 6; later adopted, and adapted, company-wide
- Built the frontend of a failed-payment email flow that brought more customers back to pay

Reach plc - Full Stack Software Engineer, London · Oct 2019 - Nov 2023

- Rebuilt a legacy Java backend as Node.js/TypeScript microservices (Express, AWS, Postgres, Kafka)
- Built the account dashboard (React, TypeScript) on a third-party identity platform, supporting 5M+ user registrations
- Launched a reader contribution scheme (Stripe, AWS) and a custom e-commerce experience, both adding new revenue

EARLIER

AtomInvest, Full Stack Developer (React, Node.js, MongoDB), 2019 · NovoVape Ltd, Co-founder, e-commerce UK & Italy, 2017–2018 · Barclays UK, Business Analyst, and Fortune Law, Paralegal, 2017–2019

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, GraphQL, styled-components, Tailwind · **Backend:** Node.js, Express, Postgres, MongoDB, Kafka, AWS, Docker · **Quality:** TDD, Jest, React Testing Library, Cypress, Storybook, CI · **AI-assisted development:** Claude, GitHub Copilot, spec-driven workflows

EDUCATION

Flatiron School, Software Engineering Immersive, 2019 · BPP Law School, Graduate Diploma in Law, 2017–2018 · University of Naples, Master's in Law, 103/110, 2015
